# SUCCESS STORIES

## TELECOMMUNICATION COMPANY

### THE SITUATION

An international Telecom company needed Contractor for convergence of multiple databases across legal entities into a sole source data repository of ESG customer information that encompasses hierarchy standardization and to be utilized by various business organizations including marketing, sales, product management, compensation and customer management.

### THE RESPONSE

Technica worked with Ascential Software, the Telecom's software development partner, to determine the scope of development and production team resource requirements.

### THE RESULT

Technica provided 6 developers needed to develop ETL code to summarize the data elements identified in this project into a SQL Server 2000 database and create monthly summary tables, and 4 business objects developers, several project managers and additional ETL testers.

## TRANSPORTATION COMPANY

### THE SITUATION

Transportation Company needed Applications Systems Architects for overall application systems architecture requiring knowledge of all aspects of designing and constructing new and existing application systems. Focus is primarily on developing and documenting the requirements for data, workflow, logical processes, hardware, and operating system environments, interfaces with other systems, internal and external checks and controls, and outputs.

### THE RESPONSE

Technica provided specialists expertise in Security and Data Storage with skills such as, Websphere MQ, Security infrastructure, J2EE, .NET Framework, Siteminder, LDAP, SSL, encryption services and Oracle 10g for development of the logical architecture solution and collaborating with domain-specific architects to develop the physical architecture solution.

### THE RESULT

Technica provided 4 Sr. Architects enabling the company to successfully design and construct their data application system.

### ONGOING

Technica continues to provide technical consultants for other development teams within this organization.

American Airlines
